# PRESS RELEASE

Key2iD announces the release of the Site-Track® Mobile Application  
*Version 1 released now*

**Wokingham, APRIL 11, 2018:** Key2iD Limited today announced the release of their Site-Track® Mobile Application.

Site-Track® is a comprehensive Asset Management system, which provides detailed records of both above and below ground assets. Key2iD uses Auto-ID technologies, including RFID, QR Codes and Barcodes to deliver Site-Track® services through the development of simple to use mobile software, linked to a spatial database, with "Always on" capability.

Site-Track® Mobile has been developed to run on both Android and iOS tablets and smartphones.

Headquartered in Wokingham, Berks, UK, Key2iD Limited is a leading distributor of 3M Locating and Marking products, and specialises in consultancy on, and the design of, asset management solutions for businesses of any size and capability.

For information on Site-Track®, or to arrange a no obligation meeting/demonstration, contact Key2iD:
