# PRESS RELEASE

Key2iD is pleased to announce a strategic partnership with Safe Locate Solutions Inc.

*Expanding Site-Track® services into Canada*

**Wokingham, October 11 2018:** Key2iD Limited today announced a new strategic partnership with Safe Locate Solutions Inc. of Canmore, Alberta, Canada. The agreement allows SLS to market, distribute, sell and rent Site-Track® services to their client base across Canada.

Site-Track® is a comprehensive Asset Management system, which provides detailed records of both above and below ground assets. Key2iD uses Auto-ID technologies, including RFID, QR Codes and Barcodes to deliver Site-Track® services through the development of simple to use mobile software, linked to a spatial database, with “Always on” capability.

Safe Locate Solutions Inc. offers a range of services to their client base to include; end to end Project Management, (planning through to engineering, design, procurement and construction management), Site Inspections, HSE, QA/QC Management and Asset Management.

SLS is dedicated to reducing cost, time, and the overall risks associated with the location, identification, and maintenance of customer’s underground assets, through the utilization of innovative technologies and superior service. SLS is determined to create efficiencies in pipeline inspections using established systems and processes and innovative technology.

Headquartered in Wokingham, Berks, UK, Key2iD Limited is a leading distributor of 3M Locating and Marking products, and specialises in consultancy on, and the design of, asset management solutions for businesses of any size and capability.

For information on Site-Track®, or to arrange a no obligation meeting/demonstration, contact Key2iD:
